

Limsophy BPM

QM SYSTEM CARE

Easy and simple management of QM system

- ➔ managing QM systems
- ➔ managing responsibilities
- ➔ controlling documents
- ➔ drawing flow charts
- ➔ improving QM system

mma
multimomentanalysis

MULTI-MOMENT-ANALYSIS

Effort measurement and facts

- ➔ find time wasting activities
- ➔ provide foundation for decision making
- ➔ identify bottlenecks
- ➔ aide process optimization
- ➔ statistically evaluated data

THE OPTIMUM IS DETERMINABLE

QM systems document the way in which companies work. In general, tasks and responsibilities can be grouped together in processes and managed by Limsophy BPM. Businesses are changing, and so are their processes. Decision-making suggestions are needed, so that the processes can be adapted.

MMA is used to determine which tasks are carried out and to what extent. It provides the necessary information for statistically driven decisions to be made. These processes can then be suitably adapted in Limsophy BPM.

CUSTOMER BENEFIT

- ➔ makes the cost / benefit case for optimum quality easily measurable
- ➔ the QM system in Limsophy BPM is the foundation for the MMA improvement analysis
- ➔ processes are transferred directly to MMA from Limsophy BPM – no need for manual re-keying of data
- ➔ MMA campaigns are stored in Limsophy BPM and can be traced in time
- ➔ MMA findings are implemented in the QM system with Limsophy BPM
- ➔ time-consumers and bottlenecks are quickly recognized by MMA enabling process optimization
- ➔ MMA measurements form the foundation of solid decision making
- ➔ process optimization is implemented using Limsophy BPM
- ➔ the integrated benefits of both systems, MMA and Limsophy BPM power systematic and optimal decision making in process optimization
